50% Bonus Depreciation Returns in 2012

Source: Tom Copeland’s Taking Care of Business
www.tomcopelandblog.com

It’s not as good a deal as family child care providers had in 2011, but it’s better than nothing.

Starting in 2012, child care providers can use a new 50% additional depreciation rule that allows you to deduct certain items faster. These items must be purchased new in 2012.

They include:

- New office equipment (computers, etc.),
- Furniture,
- Appliances,
- Carpeting,
- Fence, patio and other equipment.

Home improvements and the purchase of a home are not eligible for this rule.

Here’s an example of how the 2012 50% rule works. Let’s say you buy a fence for $1,000 and your Time-Space Percentage was 40%. Your business portion would be $400. Normally you would depreciate the $400 over 15 years (as a land improvement). But the new 50% depreciation rule allows you to deduct 50% of the amount in 2012, or $200 ($400 x 50%). You would depreciate the other $200 over 15 years. Your 2012 deduction on the second $200 would be $10 ($200 x 5% = $10 first year of fifteen year depreciation) for a total deduction of $210.

Without this new rule, you would have to depreciate the full $400 over 15 years: $400 x 5% = $20 deduction for 2012.

Note: Some child care providers put up a fence because licensing requires it. Other child care providers don’t have young children of their own. In these situations, you could depreciate the full $1,000. Using the new rule, you would deduct the first $500 and depreciate the second $500 ($500 x 5% = $25), for a total of $525.
The IRS has announced that the 2012 standard mileage rate will be $.555 per mile for business trips. The 2011 standard mileage rate is $.51 for trips taken between January and June, and $.555 for trips taken between July and December 2011.

Have You Recorded Your Vehicle’s Odometer Reading Yet?
Source: Tom Copeland’s Taking Care of Business
www.tomcopelandblog.com

The beginning of each new year means it’s time for family child care providers to record the odometer readings for each car, truck or van you use in your business.

Record your odometer reading as of December 31, 2011. File this information with your 2011 records. Next, record the odometer readings as of January 1, 2012 and file this with your 2012 tax records.

You want to record odometer readings at the beginning and end of each year so you can calculate the total number of miles you drove your vehicle in the year. This will be used to help determine the percentage of miles you drove for business purposes each year. If you use the standard mileage method of claiming vehicle expenses you can deduct this business percentage of your vehicle loan interest and vehicle property tax.

If you use actual mileage method of claiming vehicle expenses you can deduct the business percentage of all your vehicle expenses (gas, oil, repairs, insurance, vehicle depreciation, loan interest, and so on).

If you didn’t record the odometer reading of your vehicle on January 1, 2011 try to estimate it. If you serviced your vehicle close to this date, look on the work invoice where the odometer reading may be recorded. You can always take the total number of miles you have driven the vehicle since you owned it and divide it by the number of months you’ve owned it. Multiply this average monthly mileage by 12 to estimate your 2011 mileage.

Nearly every provider can save money on their taxes by keeping accurate odometer readings each year.
